SUMMARY

Computer Science undergraduate with hands-on experience in software engineering and full-stack development using the MERN stack. Built real-world applications involving REST APIs, databases, authentication, real-time systems, and payment integration. Strong foundation in data structures, algorithms, object-oriented programming, and software development principles. Seeking Software Engineer internship and placement opportunities to design scalable applications, solve complex problems, and contribute to high-impact engineering teams.

EXPERIENCE

- Founded WAIVE (Web AI Integrated Virtual Engineering) to explore web development and AI-driven solutions.
- Defined the organization's vision, technical roadmap, and project objectives.
- Researched and evaluated modern web and AI technologies for potential implementation.
- Developed prototype solutions and proof-of-concept applications.
- Established development processes, documentation practices, and project planning workflows.
- Coordinated project activities and technical decision-making throughout development.

Web Development Intern

SkillCraft Technologies

September 2025 - October 2025

- Developed web applications using HTML, CSS, and JavaScript, delivering responsive user interfaces across desktop and mobile devices.
- Built and enhanced 5+ frontend components, improving usability and consistency across multiple web pages.
- Diagnosed and resolved 10+ frontend issues related to layout, responsiveness, and browser compatibility.
- Implemented responsive design principles and accessibility best practices, improving user experience across multiple screen sizes.
- Optimized website assets and frontend code, contributing to improved page performance and load efficiency.

PROJECT

CampusEats – Campus Food Delivery Platform

[campus-eats-drab.vercel.app/](#) • January 2026 - Present

- Developed **CampusEats**, a full-stack campus food delivery platform comprising **4 user roles** (students, vendors, delivery partners, and administrators) using React.js, Node.js, Express.js, and MongoDB.
- Implemented secure authentication and **role-based access control for 4 distinct user types**, enabling separate dashboards and workflows for each stakeholder.
- Built real-time order tracking and status updates using Socket.IO, supporting **instant order state synchronization** between customers, vendors, and delivery partners.
- Integrated Razorpay payment gateway to enable **100% digital payment processing and automated transaction verification** for online orders.

Sri Adithya Furniture – Business Website (Real Client Project)

Frontend Web Technologies • [sriadithyafurniture.shop/](#) • September 2025 - October 2025

- Designed and developed a responsive business website featuring **20+ furniture products** and service offerings.
- Implemented a WhatsApp click-to-chat feature, enabling **one-click customer inquiries** and faster communication.
- Optimized website performance, reducing page and image load times by approximately **80%**.
- Applied image optimization and efficient asset-loading techniques, reducing overall page size by **more than 50%** and improving load speed.
- Deployed the website on a custom domain, making it accessible to **100% of online visitors** and supporting real-world business operations.

ProcessOptima – System Process Analyzer

November 2025 - December 2025

- Developed a real-time system monitoring dashboard that tracked **3 core system metrics and hundreds of active processes** with sub-second refresh intervals.
- Visualized **100+ system resource data points per minute**, enabling dynamic monitoring of CPU and memory utilization.
- Displayed and managed **200+ concurrent system processes** in a structured tabular format, improving process visibility and analysis.
- Implemented automated alerts and generated **one-click exportable JSON reports containing complete performance snapshots** for diagnostics and auditing.

Personal Portfolio Website

HTML, CSS, JavaScript • [manideep1822.github.io/Portfolio/](#) • October 2024 - November 2024

- Developed a comprehensive online portfolio showcasing **5+ projects** and web development skills.
- Built a fully responsive design adaptable to **desktop, tablet, and mobile devices**.
- Optimized website load time by **20%** through performance improvements.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Lovely Professional University • Jalandhar, Punjab • 2024-2028

- 12th - Science (96%), Sri Sarada Junior College, Vijayawada, Andhra Pradesh, 2022-2024
- 10th - Science (92%), Aravinda High School, Vijayawada, Andhra Pradesh, 2021-2022.

CERTIFICATIONS

Programming Using C++

Infosys Springboard • 2025

Python and Django Framework for Beginners

Udemy • October 2024

Effective Time Management

CodingTantra • October 2024

INVOLVEMENT

Founder and CEO

- Lovely Professional University, Punjab • WAIVE (WEB AI Integrated Virtual Engineering) • February 2025 - January 2026
- Founded WAIVE (Web AI Integrated Virtual Engineering), establishing a venture focused on integrating web development and AI technologies across 2 core domains.
 - Defined the organization's vision, technical roadmap, and project objectives, guiding strategic decisions from inception through development.
 - Researched and evaluated 10+ modern web and AI technologies to identify suitable tools, frameworks, and implementation approaches.
 - Secured initial seed funding from a university incubation centre, supporting project development, AI research initiatives, and operational tooling costs.

SKILLS

Skills 1: Python, C, C++, JavaScript, Java

Skills 2: HTML5, CSS3, JavaScript, React.js, Vite

Skills 3: Node.js, Express.js

Skills 4: MongoDB

Skills 5: Git, GitHub, VS Code
